MARCHING BRASS

825's Marching Brass Series is built for ALL players, no matter your entry point. Instrument design and creation derives from decades of experience and success in the marching world. 825 recognizes the demands and challenges required for greatness.

- Each voice has been considered individually for remarkable sound quality across the entire ensemble.
- Ergonomically designed to reduce fatigue
- Balanced low brass with no bell-heavy feeling
- Strategically placed braces offer ultimate durability
- Significantly greater mass in the mouthpieces stabilizes air and tone immediately
- Long lasting, thick, super-shiny silver or lacquer plating finish
- A longer main tuning slide featured on the professional trumpets allows performers to stay in tune in colder temperatures
- Tuning slide marks allow for quick ensemble tuning based on experience with temperature, humidity and elevation

ON YOUR MARK.
